

02.06.2016 - On May 29th, a team of sporty colleagues of the International Organization for Migration (IOM) and the United Nations - UNRIC joined forces for the third consecutive time to compete in the [20km of Brussels](#) , bringing the [#iamamigrant](#) campaign to the attention in this years' edition.

This campaign, which is supported by a broad range of actors such as Facebook, is about humanising migrants' stories of migration and provides a platform to present their narratives in their own words, aiming to help change the lens through which people view migrants and migration. These stories are then shared on the campaign website, on social media and through many other outlets worldwide, showing that *“Migration has a human face. Migration is diverse”*.
